Karachi, Pakistan (Open to Remote)

PERSONAL STATEMENT

Computer Science undergraduate with a keen interest in software development, problem-solving, and web technologies. Currently in my 3rd year, I have gained hands-on experience in Data Science and Cybersecurity through multiple professional virtual internships. Proven ability to apply Python and machine learning basics to create functional AI tools and manage database systems. Passionate about learning new programming languages and contributing to impactful, scalable tech projects.

WORK EXPERIENCE

Data Science Intern | Money Mitra Network

February 2026 – March 2026

- Successfully completed a one-month intensive internship program focused on Data Science applications.
- Demonstrated sincere and professional performance while managing assigned technical responsibilities.
- Developed a deeper understanding of data workflows and professional industry standards.

Data Science Intern | CodeAlpha

January 20, 2026 – February 20, 2026

- Selected for a competitive remote internship to apply theoretical knowledge to hands-on Data Science projects.
- Participated in structured orientation and skill-building sessions to master new technical concepts.
- Performed all allocated work to a high standard, focusing on practical knowledge gained as an intern.

Cybersecurity Virtual Intern | SYNTECXHUB

January 15, 2026 – February 2026

- Engaged in a flexible, remote industry experience designed to tackle real-world cybersecurity challenges.
 - Produced high-quality work to build a strong professional portfolio in the security domain.
 - Adhered to strict corporate terms regarding confidentiality and intellectual property during the program.
-

EDUCATION AND TRAINING

Bachelor Science of Computer Science

Jinnah University for Women | 2023 – Present

- Currently in 3rd Year (5th Semester)
- Relevant Coursework: Data Structures, Algorithms, Database Systems

DIGITAL SKILLS

- **Languages:** Python (Beginner), Java (Beginner), HTML, CSS, Assembly Language
- **Frameworks & Libraries:** NLP Basics, Simple ML Models, Text Preprocessing Algorithms
- **Web & APIs:** Basic MySQL schema design and query optimization
- **Cloud & DevOps:** Git and GitHub for project collaboration and version control
- **Databases:** MySQL
- **Design Tools:** Photoshop, Illustrator, MS Excel, PowerPoint

PROJECTS & PUBLICATIONS

Fake News Detection System – Machine Learning Project

Implemented a machine learning model to classify news articles as real or fake.

Applied text preprocessing and classification algorithms to identify misinformation.

AI Resume Screener – Python Project

Created a tool that analyzes resumes and highlights key skills using basic NLP techniques.

Assembly Language Calculator – Low-level Programming *

Built using emu8086 to perform arithmetic operations, demonstrating core hardware-software interaction.

AI Chat Agent & E-Commerce Database

Developed a rule-based conversational agent for query response and a MySQL schema for order management.

COMMUNICATION AND INTERPERSONAL SKILLS

- Strong collaboration through university coding competitions and hackathons.
 - Technical documentation skills gained through various university projects and internships.
 - Active member of the university programming club, participating in weekly coding challenges.
-

ORGANISATIONAL / MANAGERIAL SKILLS

- Experience in task prioritization while managing concurrent academic and internship schedules.
- Contributing to open-source projects on GitHub in beginner-friendly repositories.

LANGUAGES

- **English** – Professional Proficiency
- **Urdu** – Native
